

- 1. Outline the possible explanations for the origin of the Cosmos.**
- 2. Why did modern science develop in the Christian West instead of some other area of the world?**
- 3. “Evolution is a fact amply demonstrated by the fossil record and contemporary molecular biology.” How can we refute Carl Sagan’s claim that evolution is a “fact” by using the fossil record and contemporary biology?**
- 4. Why is evolution so fiercely defended and advanced in our culture today?**
- 5. Discuss (meaning examine both sides of the issue) the idea of the “Big Bang”.**
